Premium
ALUMINUM STORM DOORS

Welcome Home

Anatomy of a Great Storm Door Solid Construc-

OURS

THEIRS

Welded Corner

- No Air
- No Water
- Never Separates

Screwed Together

- Rattles
- Separates
- Air & Water Enters

More Air/More Light

HGI uses heavier frames and welds all corners, allowing for a narrower frame. A narrow frame equates to more air and more light. 12% more air. 12% more light. More of your main door is visible: 1.7 square feet more.

Premium ALUMINUM STORM DOORS Features

Tempered Safety Glass

Heat-tempered safety glass ensures the safety of all family members and provides a clear weather shield that is three times stronger than regular glass.

Non-Glare Fiberglass Screen

HGI's fiberglass screen won't dent or puncture like an aluminum screen and offers a clean, non-glare view.

Contour Panels

Contour panel dividers provide a rich look to door panels while adding rigidity to the already strong .0625" gauge kick pan.

Kick Panels

Kick panels feature a textured finish

Heavy-Duty Pneumatic Closures

with wind chains provide smooth easy closing with a pull-close feature to ensure proper latching.

Choice of Hardware

Choose from our Albany in black or white, The Brookfield in six finishes or our Full Mortise Lever lock in three metallic finishes.

Arc-Welded Corners

HGI's metal inert gas (MIG) welded corners provide the strongest door available, in fact the corner is the strongest point on the door. Storm doors that are screwed together loosen, rattle & sag over time.

Unique Pocket Hinge

Our nested hinge provides strength where it is needed most. As the frame of the door carries the weight, the hinges are not being pulled from the door during operation like competitors doors. Our hinges are self-lubricating and maintenance-free.

1 1/4" Thick .062" Heavy Gauge Aluminum

Our premium aluminum is dent resistant and sturdy enough to provide years of beauty and performance.

Cove Molded Frame

Our unique cove molded frame profiles offer beauty and style to your front door.

Heavy-Duty Pet Screen

Pet Screen resists tears and punctures caused by pets. Made of strong vinyl-coated polyester, Pet Screen is seven times stronger than traditional screening.

Flex Screen

All HGI Self-Storing (Vented) doors are supplied with this Shark Tank phenomenon product. This durable, unique screen can be taken out or installed in five seconds.

Tinted Glass

Optional Tinted Glass offers added privacy, creates energy efficiency, provides protection from the sun and reduces glare.

Luma~Stain

Home Guard is now offering a faux wood grain stain to match (not mask) the HGI Entry Doors. These beautiful doors are ***only*** available when sold in conjunction with an HGI Stained Entry Door System. Homeowners love the look of stained wood, but would like to have the option of a screen or **glass outer door**. Historically, the only option was a painted storm door which detracted from the entry door. Our system (available only in a one-lite, style 100 or 108 VWG) blends nicely with our stained entry doors to offer the best of both worlds. All lineal components (door frame, glass frame, screen, Z-bar and expander) will be stained one of the HGI stain colors to match your new HGI Entry System. The three coat process will provide beauty and elegance, yet not conflict with the color of the entry door. Available ***only*** with the purchase of an HGI Stained Entry Door System, exclusively by Home Guard Industries.

Vented Storm

To allow the circulation of air for doors in high heat situations, HGI offers the Energy Shield 108V Door. Doors with certain exposure to the sun, coupled by a dark color entry door, can produce temperatures in excess of 300°. These high temperatures have damaging effects to finishes, glass, frames and door seals. The 108V has an interchangeable screen and glass unit for the bottom of the door to allow air to circulate during the warmer months of the year. The vent screen comes standard with our durable pet screen mesh.

108V

Color Options

The HGI exclusive color match system ensures that your powder coated storm door can match HGI entry doors, vinyl windows and sliding patio doors.

PRO•MATCH COLOR SYSTEM

All HGI storm doors and components are coated using a high temperature baked on electrostatically applied powder coat. Powder coating is the most advanced exterior coating available with a finish many times harder and more scratch resistant than conventional wet paint. HGI is one of very few manufacturers that provide this more expensive and more durable coating.

Due to the limitations of the printing process, printed colors will vary from the actual color. Please see your HGI representative for exact color samples.

Low Maintenance

HGI Powder Coat

- More scratch resistant
- 2X Harder than paint
- Better Color Retention

Competition

- Scratches easier
- Fades quicker
- Paints can flake & peel

All HGI Self-Storing (Vented) doors are supplied with this Shark Tank phenomenon product. This durable, unique screen can be taken out or installed in five seconds.

Joe Artieri
Inventor of
Flexscreen

Invisible.

We engineer storm doors for air, light, insulation and security. HGI doors offer all this and more...Our storm doors have narrow rails and are perfect matches to our entry door colors and stains. Show off your beautiful entry door and make your storm door invisible.

OLD WORLD CRAFTSMANSHIP MEETS MODERN TECHNOLOGY

HOME GUARD Industries' modern, 170,000 sq. ft. manufacturing facility is located on 22 acres right in the heart of the small community of Grabill, Indiana. Grabill is a quaint town of 900 residents, supported by antique and custom cabinet shops. The surrounding area has been farmed by generations of Amish families, well known for their detail and craftsmanship. The Grabill location provides HOME GUARD with the perfect atmosphere to produce custom window and door products with uncompromising efficiency, speed and quality.
